

Yale® solutions for the

beverage industry.

Overcoming the challenges of the beverage industry.

Yale provides a range of trucks and attachments particularly suited for the beverage industry.

As the beverage industry increases its global footprint, Yale materials handling provides reliable solutions throughout the world with global coverage through local service support, adaptable service contracts, a diverse range of ICE and electric truck ranges, short and long term rental and telematics making your forklift truck operation run smoothly and efficiently.

Raised cab for improved visibility.

Solutions suited to the beverage industry

Tall loads such as palletised crated bottles impair the driver's visibility and driving in reverse for long periods effects operator productivity. Yale trucks come with high operator cabs on electric 2.2t to 3.5t counterbalance trucks, raised by 350mm on standard and side battery extraction (SBE) chassis or 450mm on standard chassis only. High operator cabs are raised by 500mm on 2.5 to 5.5t internal combustion engine (ICE) trucks. A 15° swivel seat and rear grab handle with horn button, helps reduces operator fatigue, increasing productivity.

Factory fit options with two year or 4000 hour warranty.

Meyer® Multi Pallet Handling attachment.

Benefits include;

- Low grease requirement, clean load, clean environment, long wear life
- Fast fork mounting/demounting and fork positioning – easy in use
- Fast rotation speed with high torque
- Only encapsulated guide system on the market
- Precision machined hardened chromed shafts
- High performance bushings for smooth running and no sagging of the outer forks leads to safer transport of loads
- Fully adjustable flow rates through the Yale dashboard, complete match of truck and attachment for optimum performance
- Flexible use due to interchangeable class II and class III mounting options for short term and fleet rental
- Profile design gives unique module concept with high flexibility
- Built for heavy duty applications
- Excellent operational speed
- Torsion resistant steel profiles

Bolzoni® Rotator Attachment.

- Fast fork mounting / demounting and fork positioning – easy use
- Open center and minimized overall dimensions – optimum visibility
- Fast rotation speed with high torque – high work efficiency
- Easy and low maintenance requirement – lowest life cycle cost
- Reliable and robust
- Various fields of use – highly flexible
- Various options available

Environmental challenges

At Yale we are conscious of the ever-increasing beverage industry environmental challenges. So bearing this in mind, our trucks can be fitted with:

- Mud flaps to protect attachments from road debris, increasing service life
- Overhead guard provides the truck operator with protection from falling bottles
- Automatic speed reduction from outside to inside, no requirement for any auxiliary equipment to be fitted on site

Features designed for those working in the beverage industry environment

Driving in dark areas, under mezzanines or inside trailers can be hazardous for the truck operator as well as others working in and around the site. Yale provide trucks with:

- Mast mounted LED lights to reduce mast shadow from work lights
- LED Pedestrian Awareness Lights

Red zoning lights allow employers to indicate the required distance pedestrians should stand away from the truck.

Power options

Truck energy consumption can be an issue for electric trucks creating a need for charging rooms or stations that take up valuable storage space and truck availability whilst trucks are on charge and battery maintenance can be costly.

Yale provides alternative truck power solutions that can be used on-site including;

- Diesel and LPG powered trucks,
- Fully integrated lithium ion batteries, eliminating battery change rooms
- Using Li-ion also reduces the site carbon footprint as energy is saved

The MP16-22 Pedestrian Powered Pallet truck

Designed to help you maximise the productivity of your operation. Working effortlessly and efficiently even in the smallest spaces, the MP16-22 is designed around the needs of the operator and offers intelligent ergonomics and unrivalled manoeuvrability.

About Yale[®]

Yale is a leading global manufacturer and supplier of high-quality counterbalance forklift trucks, warehouse equipment and fleet solutions. 'People, products and productivity' sums up our approach to the materials handling business. With over 140 years' experience, we are proud of our reputation as an innovative, forward-thinking manufacturer.

Yale dealerships provide flexible truck servicing solutions and are linked to one of the industry's most sophisticated parts distribution operations. You'll find support for Yale forklifts throughout the EMEA region – provided by a big regional footprint stretching through Europe, Middle East and Africa.
